

TOWN OF BEL AIR SNOW REMOVAL OPERATIONS

SNOW REMOVAL SAFETY: Structures such as mailboxes, parked vehicles, basketball hoops, landscaping, etc., located within the road right-of-way interferes with the safe operation of our snow plows and equipment and the safety of our drivers.

The Public Works Staff strives each winter to keep the Town roads, sidewalks and right-of-ways clear of ice and snow in an effort to provide a safe environment for its citizens.

SNOW REMOVAL DAMAGE: During snow and ice removal operations, property damage may occur. The Town or the Town's Insurance Company will honor claims for damages resulting from contact with snow removal equipment ONLY -- not as a result of the weight or impact of snow & ice being moved by equipment.

Section 13.102 of the Town Code states, in part, that all tenants and property owners are required to remove all snow and ice from pavements and sidewalks, abutting their property, within 24 hours after the snow ceases to fall.
